

HDPE Liner/Geotextile/Geocomposite/ Fabric Formed Concrete Project Refinery Completed: 4Q13

US FUSION recently completed a multi faceted geosynthetics project in a Gulf Coast refinery. The project consisted of 80,000 SF (4" & 6" articulating block) of fabric formed concrete, 200,000 SF of HDPE 60 mil textured liner and 120,000 SF of 250 mil/8 oz. double sided geocomposite. The client's top priority was safety and USF was able to surpass all requirements and complete the project on time.
