

Firewater Piping & Liner Cap Petrochemical Plant Completed: 1Q13

US FUSION worked as a sub to the General Contractor on a project inside of a Gulf Coast Petrochemical plant. The project consisted of 20 LF of 8" FM Class 200 HDPE Pipe & 380 LF of 10" FM Class 150 firewater piping. USF also installed 52,000 SF of 200 mil/6 oz. double sided geocomposite and 52,000 SF of 60 mil HDPE liner. The liner system was used to cap the installed slurry wall.
